TECHNICAL CONSIDERATIONS (NOT FOR UL FIELD REPRESENTATIVE USE):

This component has been judged on the basis of the spacings required in the Standard for Light Emitting Diode (LED) Light Sources for Use In Lighting Products, Subject 8750, Issue 3, July 22, 2008, Section 7.10, which would cover the component itself if submitted for Listing. This product complies with NEC Class 2 output limits only.

USR - Indicates investigation to the United States requirements for the Outline of Investigation for Light Emitting Diode (LED) Light Sources for Use In Lighting Products, Subject 8750, Issue 3, July 22, 2008; the Standard for Fluorescent Ballast, UL 935, Tenth Ed.; and the Standard for Class 2 Power Units, UL 1310, Fifth Ed.

CNR - Indicates investigation to the Canadian Standard for Luminaires, CSA C22.2 No. 250.0-08; and the Standard for Power Supplies with Extra-Low-Voltage Class 2 Outputs, CAN/CSA-C22.2 No. 223-M91 dated June 1991 (Reaffirmed 2003).

Conditions of Acceptability -

Use - For use only in (or with) complete equipment where the acceptability of the combination is determined by Underwriters Laboratories Inc.

1. These products are rated with a Tc location that is located on a label. See ILLS. 30 and 31 for the exact location of Tc. The maximum rated case enclosure temperature at the Tc location shall not exceed 90°C in the end product application.
2. The units are not provided with an external grounding connection. Consideration for connecting the metal enclosure to a suitable grounding point shall be considered in the end product.
3. The products were tested while connected to a 20 A branch circuit. If used on a branch circuit greater than 20 A, additional testing may be necessary and shall be considered in the end product.

Conditions of Acceptability - (CONT.)

- 4.* The LED supplies have been evaluated using the following loads resulting in a maximum input current as noted. The need for repeating tests related to heating **b** shall be considered in the end product.
